Forecast for Monday 19 Sep 2022

Weather: Clear spells and patchy cloud to begin on Monday with mist and fog patches in the valleys clearing by mid-morning. Fair-weather cloud bubbling up during the middle of the day, making it cloudier at times with the chance of isolated, mostly light, showers. The cloud breaking up a bit more for late afternoon with some clear intervals developing for the evening and night time.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Poor visibility in early mist and fog. Patchy cloud at around 600m will graze higher summits at times during the morning, most likely on northwestern facing slopes, bringing poor visibility as a result. Cloud in the afternoon will largely be above the summits but occasionally drop to 700-800m in any passing showers. During these light showers, visibility at lower levels may drop to moderate.

Forecast for Tuesday 20 Sep 2022

Weather: Clear spells to begin the day with early mist and fog in the valleys clearing by mid-morning. Higher-based cloud will make sunshine hazy at times throughout the day. Skies clearing a bit more into the evening. Dry throughout.

Maximum wind: 10mph southwesterly winds on the hills.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Cloud largely above the summits but patches may occasionally drop to 600m on windward slopes. Poor visibility in any early valley mist but good from then on.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 18 Celsius.
At 600m: Plus 8 Celsius, rising to plus 10 Celsius.
Freezing level: Above the summits.
